01

Executive Summary

Executive Summary

- Total sales and revenue analyzed to understand customer preferences and business performance.
- Medium pizzas are the most popular size, driving nearly half of total orders.
- Top 5 pizzas contribute a major share of both revenue and sales volume.
- Peak orders occur in the evening (**6–8 PM**), highlighting clear demand patterns.
- **Classic pizzas** dominate overall sales, while **premium categories** (Supreme & Gourmet) deliver higher revenue per order.
- Insights provide actionable opportunities for **marketing, inventory, and operations**.

02

Dataset Overview

Dataset Overview

- Orders: Order IDs, dates, and times.
- Order Details: Specific pizzas and quantities per order.
- Pizzas: Size, price, and type.
- Pizza Types: Category and ingredients.
- Dataset covers thousands of transactions, suitable for identifying sales patterns and revenue drivers.

03

Sales Performance

Sales Performance

- Total Orders: **21,350**
- Total Revenue: **\$817,860**
- Highest-Priced Pizza: **Thai Chicken Pizza (\$35.95)**
- Most Popular Size: **Medium ($\approx$ 45% of sales)**

04

Top Products

Top Products

Top 5 Best-Selling Pizzas (by Quantity):

Classic Deluxe Pizza

BBQ Chicken Pizza

Hawaiian Pizza

Pepperoni Pizza

Five Cheese Pizza

- Together, they account for nearly 30% of total sales volume.
- Premium pizzas (e.g., Thai Chicken, Shrimp Pizza) contribute more revenue per order, though in smaller quantities.

05

Category Insights

Category Insights

Classic pizzas

Highest sales volume.

Supreme pizzas

High-value orders, strong revenue share.

Veggie pizzas

Moderate sales, potential for targeted promotions.

Chicken pizzas

Strong evening demand.

06

Time-Based Trends

850

Time-Based Trends

Hourly Distribution: Orders **peak** between **6–8 PM**.

Daily Patterns: Steady demand across the week, slight **increase** on **weekends**.

Cumulative Revenue: Consistent upward growth, no major dips → **stable business performance**.

07

Revenue Contribution

Revenue Contribution

Top revenue-generating pizzas:

Thai Chicken Pizza

BBQ Chicken Pizza

Classic Deluxe Pizza

These account for nearly 25% of total revenue.

Contribution analysis shows strong reliance on a few products, creating both risk and opportunity.

08

Recommendations

Recommendations

Marketing:

Promote medium-size combo offers (high customer preference).

Highlight top 5 pizzas in advertising.

Operations:

Align staffing and delivery capacity with peak evening and weekend demand.

Ensure ingredient availability for best-selling pizzas.

Growth:

Push premium pizzas with bundles/discounts to increase adoption.

Explore seasonal promotions for underperforming categories (e.g., Veggie).

09

Conclusion

A row of pizzas on a wooden table in a restaurant. The pizzas are topped with various ingredients like tomatoes, olives, and basil. In the background, there are people sitting at tables and a server standing near the counter. The lighting is warm and ambient.

Conclusion

- Data analysis uncovered clear sales drivers and customer behavior trends.
- Medium pizzas, evening hours, and top 5 products dominate performance.
- Business can improve by focusing marketing on popular items and operational efficiency around peak demand.
- Premium categories represent a strong opportunity for growth with targeted upselling strategies.
